150 - 140 - 130 - 120 - 110 - 100 - 90 - 80 - 70 - 60 - 50 - 40 - 35 - 30 - 25 - 20 - 18 - 16 mm size.

Wrought Mill Ball

The wrought steel balls are preferred all over the world as they are appropriate for their attractive cost and the efficient steel balls they provide in milling the mill balls. The mill balls are used in the industry of mine and mineral. The mill balls are produced from the high carboned alloy by using the latest technology. The alloy used is shaped to get the highest performance.

The brisk form of the balls both averts the breaks during milling and compensates the adequate endurance. They are produced as 58-60-65 HRC.
